

A true workaholic.

SEALMASTER® Some bearings work 9 to 5. Sealmaster works longer – and harder. Our new USRB Mounted Spherical Roller Bearings are no exception. Available in two distinct locking systems: set-screw lock with bore sizes from 1 1/8 to 7 inches and adapter lock from 1 1/8 to 8 inches, they provide unmatched performance and dimensional interchangeability. The result? More uptime – and lower operating costs. When you need to keep your business moving, you need performance bearings that work day and night. You need innovation and reliability that only Sealmaster can deliver.
