

What **if...**

one easily-integrated station could divert, transfer, and sort?

**SYSTEM
PLAST®**

At Regal® ... the MODSORT™ station can solve your transfer and diversion problems.

The MODSORT station is an innovative low-noise, low voltage modular transfer and diverter station. It can easily integrate with new or existing material handling systems, eliminating the need for a lift, pneumatics, or Z-direction position feedback devices, and can help achieve energy savings from 50-60% when integrated with a motorized roller-based system.

MODSORT utilizes System Plast® 2253RT Roller Top Belt featuring a 1-inch on-center sphere array, allowing very small packages to be moved. Motorized Drive Rollers and controls allow flexibility in wiring, the ability to move everything from exceptionally small polybags to boxes, and safe, efficient, quiet and low-maintenance operation.
