REGAL® DISTRIBUTOR TRAINING SCHOOLS

BEARINGS

We will discuss via presentation and hands-on sessions the features and benefits, construction and manufacturing, Midwest industry specific applications, competitor comparison, and installation and maintenance.

GEARING

We will cover topics including: basics, competitor comparison, features and benefits, and product selection/matching for industry specific application examples. Focus will be on understanding how to apply gearing products to provide customer value through improved operation, reliability and performance.

CONVEYORS

We will cover a variety of products including plastic chain, modular belts, conveyor tracks, extrusion profiles, ModSort® module, and bracket components. The focus will be centered to explain the features, benefits and solution capability of System Plast® products for localized industries.

COUPLINGS

We will go over the various coupling products, especially concentrating on those types most likely to be encountered in NC/SC industry. Coupling styles covered are Fast's® and Series H Gear couplings, U-Joint, HP Disc, MAX-C® Resilient couplings, Kop-Flex® & Jaure® High Performance Disc and Diaphragm couplings, paper and steel mill couplings, and other types like Grid and U-Joint. Repair/Re-recertify program and Milwaukee Gear™ products and services capabilities will also be covered.
